Tea

Japan Shincha Kirisakura - *This excellent tea from Japan is harvested in the Spring, ahead of the typical Summer harvest. Full bodied on the palate, this green defies stereotypes. Alongside its smooth, contrasting delicacy, there is a light, natural sweetness that compliments the evanescent cherry.*

<u>Tasting notes</u>: This tea is great! Off the nose, I am getting a muscatel & vegetal aroma with a hint of cherry. It's a full bodied green tea that lingers little and offers a very light briskness (0.75 out of 5, really that mild). You get a light buttery sweetness on the tongue alongside and a milder vegetal than you would get with a Sencha (the Shincha is the first month's/Spring harvest of Sencha). I definitely recommend this tea. Not horribly complex, but a lovely tea!
